

Basel III Net Stable Funding Ratio (NSFR):

Introduction

In October 2015, the Central Bank of Kuwait (CBK) issued a directive (2/BS/356/2015) to banks operating in Kuwait on the adoption of the Net Stable Funding Ratio (NSFR) as part of the Central Bank's implementation of the Basel III reforms.

The main objective of the NSFR is to promote the resilience of the banking system by improving the funding profile of banks by ensuring they have sufficient level of stable funding in relation to their assets and off-balance sheet activities.

NSFR is defined as the amount of available funding relative to the required stable funding. This ratio should be maintained at least 100% on an ongoing basis.

Available Stable Funding (ASF) figure is measured according to the relative stability of Capital & Liabilities based on their duration and behavioral characteristics of funding sources.

Required Stable Funding (RSF) is defined as the portion of assets and off-balance sheet (OBS) exposures expected to be funded on an ongoing basis over a one-year horizon. The amount of such stable funding required of a specific institution is a function of the liquidity characteristics and residual maturities of the various assets held by that institution as well as those of its off-balance sheet exposures.

Central Bank require banks to prepare NSFR report on daily basis to be reported on monthly for all business days based on the position at the end of the month and the average of daily ratio for all business days during the month for which reports are reported.

The NSFR is reported and monitored at three organizational levels: Local level ABK Kuwait (Al Ahli bank of Kuwait) excluding its overseas branches, Bank-wide level including ABK Kuwait & its overseas branches, and Group Level including all overseas branches and subsidiaries (ABK Group).

Result analysis

The Bank maintained a comfortable stable funding buffer at Group level during the business days in the **twelve months ending DECEMBER 31, 2019**.

Available Stable Funding (ASF) at ABK Group level as of end of **DECEMBER 2019** was around **KD 3,486 Million** against **KD 3,229 Million** of Required Stable Funding (RSF), resulting in NSFR of **107.9%** against CBK minimum requirement of 100%.

The Available stable Funding comprises mainly adequate capital base, Retail deposit base and long-term funding from non-financial corporate, PSEs and institutional clients.

The capital base formed around **21%**, retail deposits (including deposits from small-sized business customers) formed **39%**, and wholesale funding formed **30%** of the total Available Stable Funding after applying the relevant weights.

Net Stable Funding Ratio Disclosure – DECEMBER 2019

The Required Stable Funding comprised primarily lending to companies, businesses, corporates, retail clients and financial institutions and the off balance sheet exposures.

Performing loans comprised almost **84%** of the total Required Stable funding and rest of the components include High Quality Liquid Assets (HQLA), Non HQLA qualifying investments, commitment, off-balance sheet exposures, Other Assets and Intangibles which constitute remaining **16%** of the total Required Stable Funding for the Bank after applying relevant weights.

Quantitative information on Net Stable Funding Ratio as on **DECEMBER 2019** is provided in the table below:
