GCC market performance - Apr'11

Market review:

Most of the GCC markets had a positive performance during April. For the month the KSE was +2.53%, Saudi +2.71%, Dubai +5.18%, Abu Dhabi +2.17%, Oman -0.71%, Qatar +1.03%, and Bahrain -1.73%.

During the Month the major GCC markets recovered significantly after going through a turbulent time in the last few months. Investor confidence and market volumes improved in line with our anticipation that markets would recover significantly as the GCC in general is relatively different then the other Arab counties witnessing resistance.

Fund review:

The Al-Ahli Gulf Fund recorded a gain of +2.386% MTD and -2.296% YTD. The S&P GCC Composite Price Index was +2.71% MTD and -1.09% YTD mainly due to the Saudi weight factor of the index. The Gulf Funds gain since inception stood at +76.837%, the NAV of the fund was KD 0.833371 on the NAV date.

The fund manager shall continue to take into account the volatility of the region as a whole in deciding the asset mix and cash percentages this approach in turn has and will continue to reflect on the Fund's overall future performance. The current GCC allocations remain stable with a selective allocation of Blue Chip stocks across the region. The fund holdings are constantly monitored for the various risk factors by our investment team and appropriate action to rebalance the country allocation, cash percentages, as well as sector allocations is taken when needed.
