Market review:

According to data released by the General Authority for Statistics, Saudi Arabia registered deflation for the first time in 10 years in January 2017. Inflation contracted 0.4% YoY and 0.2% MoM in January. The YoY decline was aided by a decrease in the costs of food and beverages, transport, culture, and hotels and restaurants (down 4.2%, 3.1%, 2.2%, and 1.1%, respectively). Saudi Arabia's Purchasing Manager's Index (PMI) showed expansionary trends in January, rising to 56.7 from 55.5 in December. The improvement in non-oil business activity was supported by the steps taken by the government to infuse cash into the economy. According to the Federal Competitiveness and Statistics Authority, consumer price inflation in the UAE rose 2.3% YoY and 0.7% MoM in January. Rise in costs associated with the miscellaneous goods and services group (up 9.3% YoY) boosted the overall inflation. According to the Minister of State for Financial Affairs, the UAE government plans to apply selective tax early this year. The selective tax law, which is expected to be issued after the VAT implementation, will be imposed on unhealthy products such as cigarettes and soda. Total assets of Qatari banks contracted 0.8% MoM to QAR1.26tn in January from QAR1.27tn in December. Total credit extended stood at QAR854.1bn while total deposits

equaled QAR763.0bn. According to media reports, the Omani government intends to raise nearly USD2.0bn through the issuance of a large international bond sale this week to finance the budget deficit caused by low oil prices. Bahrain attracted investments totaling USD281.0mn from 40 new companies in 2016. These investments are expected to create 1,647 jobs over the next three years.

The fund holdings are constantly monitored for various risk factors by our investment team and appropriate actions to rebalance the country's allocations, cash percentage and sector allocations are taken when needed.
