GCC market performances - July'08

Market review:

Most of GCC markets exhibited negative performance in July 2008. Saudi's stock market was the worst performing market with (-6.54%), followed by Oman (-5.7%). The KSE market registered (-3.1%). Bahrain recorded (-2.21%), Qatar (-1.94%) and Dubai (-0.7%). The only market that ended the month of July with a growth is Abu Dhabi's market by (+ 0.45%).

This decrease was driven by the market makers while they were correcting the prices of the heavy-weight companies that were over priced at the 1st quarter of 2008.

Fund review:

Due to the loss reported by most of the GCC markets, Al-Ahli Gulf Fund achieved a loss of (-1.89%) on the MTD basis and recorded a NAV of KD 1.28 for the month of July with a return of (+8.07%) on YTD and (+109.02%) since inception.

The fund management team believes the GCC markets are under stable positive trend, which is a consequence of the strong profit announcements.

The GCC portfolios remain stable with an allocation of Blue Chip stocks across the region and stock selection is based on strong financial backgrounds and stable operational profits.
