### Performance chart

### GCC market allocation

### GCC market performance - JUNE'15

### Market review:

All of the GCC indices ended June in a positive performance except KSA (down 6.21%) and Kuwait (down 1.42). Abu Dhabi's market was the strongest performance (up 4.32%), followed by Dubai's market (up 4.17%).

The Al-Ahli Gulf Fund recorded a loss of -1.82% MTD and +11.51% YTD. The S&P GCC Composite Price Index on the NAV date was -3.51% MTD and +3.69% YTD. The Gulf Funds gain since inception stood at +110.29%. The NAV of the fund was KD 1.107913 on 30th June 2015.

The International Monetary Fund (IMF) stated that though the Saudi Arabian economy has been hit by falling oil prices, the economy would face a limited impact. The Fund added that real gross domestic product growth is projected at a healthy 3.5% in 2015, same as that in 2014, and is anticipated to slow to 2.7% in 2016. Standard & Poor's stated that residential property prices in Dubai are expected to decline 10-20% in 2015 as a result of subdued demand, slower economic activity, and downbeat investor sentiment. Qatar's Ministry of Development Planning and Statistics stated that the value of goods exported from Qatar amounted to QAR 24.8bn in May 2015, a 38.9% YoY decrease and a 4.7% MoM increase. Imports stood at QAR 9.6bn, a 10.0% YoY increase and a 9.3% MoM decline. According to Doha Bank, Qatar's GDP per capita in 2015 is expected to be USD 81,000, the highest among the GCC countries. Standard & Poor's Ratings Services has affirmed its long- and short-term foreign and local currency sovereign credit ratings on Bahrain at 'BBB-/A-3', with a negative outlook. Bahrain Sovereign Fund is currently studying several investment opportunities across GCC, Europe, and the US, with plans to make a few investments before the end of 2015. Fitch Ratings has affirmed long-term IDRs of six banks in Oman and upgraded two of the banks' Viability Ratings, with a stable outlook. The IDRs of five of these banks are based on support from the Omani sovereign, whereas the IDR of the one remaining bank was based on support from its ultimate parent. Oman's total oil and condensates production grew 1.5% MoM to 30.2mn barrels in May, with an average daily production of around 974,990 barrels. Total crude oil exports during the month increased 3.7% from that in the preceding month to 25.4mn, registering a daily growth of 819,587 barrels.

The fund holdings are constantly monitored for the various risk factors by our investment team and appropriate action to rebalance the country allocation, cash percentages, as well as sector allocations is taken when needed.
