GCC market performance - Nov'11

Market review:

All of the GCC markets had a negative performance during November except Bahrain. For the month the KSE was -2.31%, Saudi -1.70%, Dubai -2.89%, Abu Dhabi -3.13%, Oman -2.85%, Qatar -0.14%, and Bahrain +0.98%.

The Month of November pushed most indexes downward with renewed violence in Egypt, political instability in Kuwait as well as the tensions between Britain and Iran. A minor positive being better oil prices and volume increases as the last few days of the month were on positive note amid optimism that European leaders are drafting a plan to handle the debt crisis. Global indices rose on higher-than-expected US consumer confidence data and speculation of a EUR400bn bailout for Italy. The markets surged toward the end of the week after six central banks (the US Federal Reserve, European Central Bank, the Bank of England and the central banks of Japan, Canada and Switzerland) agreed to reduce dollar-lending costs to alleviate funding pressures of European banks.

Fund review:

The Al-Ahli Gulf Fund recorded a loss of -1.336% MTD and -13.091% YTD. The S&P GCC Composite Price Index was -1.99% MTD and -10.90% YTD mainly due to the Saudi weight factor of the index. The Gulf Funds gain since inception stood at +66.856%, the NAV of the fund was KD 0.733560 on the NAV date.

The fund manager has continued to take into account the volatility of the region as a whole in deciding the asset mix while accumulating stocks with operational income and strong fundamentals, this approach in turn is expected to reflect on the Fund's overall future performance. The current GCC allocations remain stable with a selective allocation of Blue Chip stocks across the region. The fund holdings are constantly monitored for the various risk factors by our investment team and appropriate action to rebalance the country allocation, cash percentages, as well as sector allocations is taken when needed.
