GCC Market Performances - Oct'07

Market Review:

Most of the GCC region's equity markets rallied during October, led by Dubai, which gain +24.73% followed by Abu Dhabi +20.06%, Qatar +16.31% and Oman +14.81%. Part of the Increase was seasonal, driven by the expected strong profit announcements for the third quarter, except of Kuwait market which decrease by -0.64% because of the unstable political situation in the country which led to a profit taking scenario

Fund Review:

Al-Ahli Gulf Fund recorded a NAV of KD 1.306 for the month of October with a return of +98.05% since inception, and a gain of +1.47% on month-to-month basis, due to the Increase in 6 out of 7 GCC markets.

The fund management team still believes that selected sectors and stocks in the GCC markets present a good case for stock accumulation. Moreover, the GCC markets are expected to consolidate after the third quarter of 2007 as investor expectations start to moderate and valuations appear more reasonable since corporate earnings growth is likely to remain on track. However, political tensions in the region will continue to remain a concern.
