GCC Market Performances - Sep'07

Market Review:

Most of the GCC region's equity markets rallied during September, led by Qatar which gained +8.19% followed by Oman +5.05%, Abu Dhabi 3.52%, Kuwait 1.28% and Bahrain +0.61%. Part of the increase was seasonal, driven by the expected strong profit announcements for the third. On the other hand Saudi and Dubai witnessed a decline for the month -4.78%, and -0.54% respectively.

Fund Review:

Al-Ahli Gulf Fund recorded a NAV of 1.286 for the month of September with a return of +96.16% since inception, and a gain of +1.35% on month-to-month basis, due to the increase in 5 out of 7 GCC markets.

The fund management team still believes that selected sectors and stocks in the GCC markets present a good case for stock accumulation. Moreover, the GCC markets are expected to consolidate after the third quarter of 2007 as investor expectations start to moderate and valuations appear more reasonable since corporate earnings growth is likely to remain on track. However, political tensions in the region will continue to remain a concern.
