The Price Index achieved a month high of 7,597.6 points on the 8th of April.

Fund review:

During April, trading activity was extremely volatile with high amount of speculation driven by the earning expectations of several companies. Some stocks witnessed high price fluctuation. The market in general was short of liquidity and direction. The Al Ahli Kuwaiti fund performance was +0.27% MTD and +5.70% YTD as compared to the KSE weighted index which was -0.73% MTD and +13.49% YTD, and its benchmark the KIC index that recorded -1.51% MTD and +12.53% YTD. The funds positive performance was due to a more cautious approach and higher liquidity protection in the Fund.

The fund managers constantly take into account the volatility of the stock market as a whole in deciding the asset mix and cash percentages in this volatile period, this approach in turn has and will continue to will reflect on the Fund's overall future performance as can be seen in the reflective performance above. We believe that an extremely careful stock selection criteria needs to be continuously adopted in the coming periods with risk aversion at its peak. The fund holdings are monitored regularly, various risk factors are taken into account by our investment team and appropriate action to rebalance both stock and cash allocations is taken when needed.
