Kuwaiti Fund Review

Kuwait Stock Exchange ended the month of August 2007 in positive territory. The KSE price index continued to edge higher recording 1.08% growth and closing at 12,686.1 points. As for the KSE weighted index increased 0.88% to reach 745.06 points during this month. Gains were broad-based with five out of eight sectors advancing. The Food index lead the advancers gaining by 10.94% followed by the Real Estate index registering 2.75% for the month of August. The daily average Volume and daily average Value of shares traded on the exchange was 284.15 million shares and KD 159.19 million respectively. Total Market Capitalization stood at KD 58,291million by month end.

Overall, the market performance seemed to Increased up during summer holidays reflecting an increase in trading activity with most companies especially the large cap. This explains why the weighted index increase is less than the price index increase on percentage basis. Another important deduction is that market activity during the month of August shows signs of strong buying conviction as a result of mixed investor sentiment.

Fund Review

During August, the fund accomplished a stellar performance where the NAV decreased by -0.453% as compared to July. As for the year to date performance, The Kuwaiti Fund recorded 40.68% YTD compared to the KSE, which recorded 26.01%. In addition, the Fund outperformed its benchmark the KIC index that recorded a gain of 32.83% for the YTD performance. Significantly, the positive growth is also due to the concentration of the fund in the banking, service, and Investment sector, which improved due to the announcements of great operational profit for the 1st half of 2007.

The fund team continues to believe that the market would reward the blue chip companies, which have great operational earnings and that would reflect on the Fund's overall return in the portfolio.
