The Price Index achieved a month high of 6,965.3 points on the 30th of December.

Fund review:

The funds growth in 2010 has been steady and positive the year was dominated by the news and roomers related to Telecom Firm, Zain and its various selloff plans.

The government's moves towards announcing of various capital projects exceeding billions of Dinars provided added fuel towards investor confidence in related stocks and services. The banking sector was the most active during the year with investors being selective towards investments by keeping away from speculative stocks. The year witnessed tighter regulations and moves towards setting up of the Capital markets Authority to independently monitor and govern investment activities. The investment activity within the country is expected to take a radical change as the new trading systems and platforms get introduced into the markets.

The Al Ahli Kuwaiti fund performance was +3.73% MTD and +13.55% YTD as compared to the KSE weighted index which was +2.40% MTD and +25.76% YTD, and its benchmark the KIC index that recorded +2.70% MTD and +22.42% YTD.

The fund managers constantly take into account the volatility of the stock market as a whole in deciding the asset mix and cash percentages in this volatile period, this approach in turn has and will continue to reflect on the Fund's overall future performance. We believe that an extremely careful stock selection criteria needs to be continuously adopted in the coming periods with risk aversion at its peak. The fund holdings are monitored regularly, various risk factors are taken into account by our investment team and appropriate action to rebalance both stock and cash allocations is taken when needed.
