The daily average Volume and average value of shares traded on the exchange for the year was 350.91 million shares and KD 55.89 million respectively. Total Market Capitalization stood at KD 31.91 Billion.

The Price Index achieved a month high of 6,700.1 points on the 28th of July.

Fund review:

During July, trading activity was boosted with the government intervention into selected stocks as well as better than expected half yearly results from several listed banks. Volumes soared during the month before being effected by profit taking towards the end of the period. The market in general was very cautious as investors took a selective approach to the equity markets.

The Al Ahli Kuwaiti fund performance was +2.22% MTD and +3.65% YTD as compared to the KSE weighted index which was +5.23% MTD and +8.41% YTD, and its benchmark the KIC index that recorded +5.68% MTD and +4.95% YTD.

The fund managers constantly take into account the volatility of the stock market as a whole in deciding the asset mix and cash percentages in this volatile period, this approach in turn has and will continue to reflect on the Fund's overall future performance as can be seen in the reflective performance above. We believe that an extremely careful stock selection criteria needs to be continuously adopted in the coming periods with risk aversion at its peak. The fund holdings are monitored regularly, various risk factors are taken into account by our investment team and appropriate action to rebalance both stock and cash allocations is taken when needed.
