Market review:

The Kuwait Stock Exchange (KSE) gained 2.3%, or 159.5 points, to end at 7,130.89 in July. Although the market opened on a negative note, it reversed its downtrend amid positive H1 2014 results as major banks posted modest to high increases in profitability. The rebound was also due to improvement in the situation in Iraq. Furthermore, the Moody's gave 'stable' outlook for Kuwait's banking sector, which lifted investor sentiment.

The volume of shares traded on the KSE declined 18.2% to 2.4bn, while value traded slumped 44.1% to KWD 246.8mn. Financial Services (1.4bn) and Real Estate (0.3bn) indices represented 71.9% of total volume traded. Banking (KWD 75.7mn) and Financial Services (KWD 76.0mn) together accounted for 61.4% of total value traded.

The fund managers constantly take into account the volatility of the stock market as a whole in deciding the asset mix and cash percentages the strategy has helped in controlling volatility in the fund's performance.
