Fund review:

The Kuwaiti market unlike its GCC counterparts was down significantly for the month and year as well. The regional issues and the cancellation of the Zain deal with Etisalat weighed heavily on the performance of the market. The introduction of the New Capital Markets Authority and their authorities has also cased the market to be more careful and concerned about the implications. However we anticipate this drop to be temporary and have used this opportunity to pick up targeted stocks at a deep discount thus as the markets recover we shall be well positioned to gain from this current volatility.

The Al Ahli Kuwaiti fund performance was -0.72% MTD and -4.69% YTD as compared to the KSE weighted index which was -2.14% MTD and -8.79% YTD, and its benchmark the KIC index that recorded -3.59% MTD and -9.89% YTD.

The fund managers constantly take into account the volatility of the stock market as a whole in deciding the asset mix and cash percentages in this volatile period, this approach in turn has and will continue to reflect on the Fund's overall future performance. We believe that an extremely careful stock selection criteria needs to be continuously adopted in the coming periods with risk aversion at its peak. The fund holdings are monitored regularly, various risk factors are taken into account by our investment team and appropriate action to rebalance both stock and cash allocations is taken when needed.
