Market review:

The Kuwait Stock Exchange ended the month of November 2008 negatively. The KSE price index was down (-9.34%), closing at 8,875.2 points. The KSE weighted index decreased by (-6.35%) touching 487.55 points.

Broad-based selling pressure pushed down all of the KSE sectors. Banking (-1.25%), Investment (-10.95%), Insurance (-4.11%), Real Estate (-11.77%), Industrial (-12.66%), Services (-1.36%), Food (-5.55%) and the Non-Kuwaiti sector (-8.82%).

The daily average Volume and average value of shares traded on the exchange was 341.26 million shares and KD 152.14 million respectively. Total Market Capitalization stood at KD 40.119 Billion at month end.

The Price Index achieved a high of 9,933.9 points on the 2nd of November for the month. During the month the Price Index continued to perform higher than the weighted Index, due to the modest activity on leading and blue chip shares in the market and increased activity on small and mid cap shares.

Fund review:

During November, the fund and comparable indices performed negatively touching (-26.40%) YTD as compared to the KSE weighted index which recorded (-31.81%) YTD, and its benchmark the KIC index that recorded a loss of (-33.99%) YTD

Significantly, the negative growth is mainly attributed to the concentration of the fund in the Real Estate, Industrial and Investment sectors, which performed poorly.

The fund team continues to believe that the market would reward the blue chip companies, with substantial operational earnings, and that would in turn reflect on the Fund's overall future performance.
