### Market review:

Kuwait's benchmark index dropped 8.3%, or 608.8 points, to end November 2014 at 6,752.9. Investor sentiment remained negative amid continued fall in crude oil prices even though Kuwait's cabinet called for steps to address the slide in oil prices. Meanwhile, the country's trade surplus contracted marginally for the third consecutive quarter in Q2 2014 to KWD 5.7bn on softer oil export growth and continued decline in non-oil exports.

Fitch Ratings affirmed the long-term Issuer Default Ratings (IDRs) of nine Kuwaiti banks: NBK, KFH, GBK, CBK, ABK, AUB, KIB, IBK and Boubyan Bank. The stable outlooks for the banks' IDRs reflect the outlook for Kuwait's sovereign rating. Kuwait's trade surplus narrowed slightly for the third consecutive quarter in Q2 2014 to KWD 5.7bn. The surplus declined steadily since Q3 2013 due to softer oil export growth and continued decline in non-oil exports (mostly petrochemical products). Kuwait's cabinet called for practical steps to address the slide in oil prices in a special session aimed at examining the weakening energy markets. During the first six months of the financial year, Kuwait's budget surplus reached KWD 8.97bn, as expenditure remained well below the initial plan. Expenditure stood at KWD 6.1bn during the period, lower than KWD 11.6bn originally planned. Kuwait plans to invest USD40bn to increase oil and gas production capacity. This is part of the country's plan to increase crude oil production to 4.0mn barrels per day by 2020.

The fund managers constantly take into account the volatility of the stock market as a whole in deciding the asset mix and cash percentages the strategy has helped in controlling volatility in the fund's performance.
