Fund Review

During October, the fund NAV decreased by -3.3% with comparison to September. As for the year to date performance, The Kuwaiti Fund recorded +37.6% YTD compared to the KSE, which recorded 26.82%. In addition, the Fund outperformed its benchmark the KIC index that recorded a gain of 33.72% for the YTD performance. Significantly, the positive growth is also due to the concentration of the fund in the banking, real estate, Industrial and service sector, which improved due to the announcements of great operational profit for the most of the listed company for the 3rd quarter of 2007.

The fund team continues to believe that the market would reward the blue chip companies, which have great operational earnings and that would reflect on the Fund's overall return in the portfolio.
