Fund review:

October trading activity was dominated by the results of companies and their effect on their stock prices was based on the outcome of these earnings. The continued uptrend is reflecting return of investor confidence towards the Kuwaiti markets on selective stocks. The markets seem to be more mature with operational income related stocks appreciating. Positive updates on the Zain Telecom deal continued to boost the market across the board.

The Al Ahli Kuwaiti fund performance was +0.42% MTD and +9.23% YTD as compared to the KSE weighted index which was +4.02% MTD and +24.24% YTD, and its benchmark the KIC index that recorded +3.87% MTD and +20.73% YTD.

The fund managers constantly take into account the volatility of the stock market as a whole in deciding the asset mix and cash percentages in this volatile period, this approach in turn has and will continue to reflect on the Fund's overall future performance. We believe that an extremely careful stock selection criteria needs to be continuously adopted in the coming periods with risk aversion at its peak. The fund holdings are monitored regularly, various risk factors are taken into account by our investment team and appropriate action to rebalance both stock and cash allocations is taken when needed.
