The Al Ahli Kuwaiti fund performance was -0.41% MTD and -0.62% YTD as compared to KSE price index +2.57% MTD and +0.95% YTD, KSE Weighted Index +0.49% MTD and +9.18% YTD and KIC Index +0.95% MTD and +6.92% YTD.

### Market review:

Kuwait's benchmark index gained 2.6%, or 191.0 points, to end September 2014 at 7,621.5. Market sentiment remained positive throughout the month, which is evident from the positive returns across trading sessions. During the month, 18 of the 22 trading sessions closed on a positive note. Moreover, news that Kuwait's non-oil growth is projected to accelerate to 3.5% in 2014 from an estimated 2.8% in 2013, according to IMF, also supported the rally.

Kuwait's budget surplus rose to KWD12.9bn in FY14 due to a fall in government spending driven by lower capital expenditure. The budget surplus, around 26% of GDP during FY14, rose marginally from KWD12.7bn, or nearly 25% of GDP, in FY13. Credit growth in Kuwait weakened by KWD218mn (the most in over four years) in July, after posting strong growth in June. This is ascribed to weak household credit due to seasonal factors such as reduced activity during Ramadan and Eid holidays. Credit to non-financial businesses also weakened, as investment companies lowered debt levels.

The fund managers constantly take into account the volatility of the stock market as a whole in deciding the asset mix and cash percentages the strategy has helped in controlling volatility in the fund's performance.
